

BodyTalk Orthopedic Evaluation Class Labor Day Weekend 2010 - Sept 3rd – 6th (9am – 6pm)

- Build your practice by being able to demonstrate immediate results with Range of Motion and tension tests.
“Even if a client is coming in for emotional issues or belief systems, they are holding the tension in their tissues. I muscle test and see which test to use, then do the session and show them the results afterwards and they sign up for more sessions, because they can see the difference that BodyTalk is making.” Toni Stevens, BAT & CBP
- Deepen your working knowledge of human anatomy including being able to sense fascial tension, joint stiffness and muscle spasm.
“Working with Kerry will expand your ability to see and feel what is happening in your client’s body.” Ian Purse, CBP
- Learn how stress, environmental influences, emotional and mental interaction can be manifested in the physical body.
“Kerry’s classes are amazing for several reasons, he is extremely knowledgeable...and his style is just fabulous, he is relaxed, available and inspiring.” Suryo Gardner, CBI

Dr. Kerry D’Ambrogio, D.O.M., A.P., P.T., D.O.-M.T.P. is an internationally recognized lecturer, author, physical therapist, osteopath and board certified acupuncture physician. He is a Senior Instructor in the renowned BodyTalk System and President of Therapeutic Systems, Inc.
